

# AcutePlus Web App

Responsive website  
and companion  
member portal.

# Project Overview

---

## **The Product:**

AcutePlus is an exclusive member benefit program crafted for equine veterinarians to offer benefits for a range of essential services, acute medical care, and final expense coverage.

## **Project Duration:**

June 2022 to August 2022

# Project Overview

---

## **The Problem:**

Equine clinics struggle incentivize horse owners to improve horse healthcare and encourage clinic loyalty.

## **The Goal:**

Design a responsive website that educates and enrolls users to an equine benefit program with a companion portal for members.

# Project Overview

---

## Role:

UX director / Lead UI designer. Crafting a responsive web app from conception to delivery.

## Responsibilities:

Ideation, design sprints, conducting interviews, paper and digital wireframing, low and high-fidelity prototyping, conducting usability studies, accounting for accessibility, and iterating on designs.

# Understand the User

- User research
- Personas
- Problem statements
- User journey maps

# User Research: Summary

---

Through interviews, journey maps, and competitive audits, we gained insights into the needs of the end user we are designing for: the traveling equestrian. Our research confirmed that a website with a clear user flow for educating and enrolling new members is key. It also uncovered additional challenges faced by this user group, such as time constraints, finding care, and structure in routine horse wellness.

# User Research: Audits

Competitive audit	Goal: Compare the user experience and features of each product.							
	General information							
	Competitor	Location(s)	Product offering	Price (\$ - \$\$\$\$)	Website (URL)	Business size	Target audience	Unique value proposition
Fetch	Indirect	New York, NY	Pet insurance and health advice	\$\$	<a href="https://www.fetchpet.com/">https://www.fetchpet.com/</a>	Medium	Dog and cat owners	Covers up to 90% of vet bills
Trupanion	Indirect	Seattle, WA	Pet insurance	\$\$\$	<a href="https://www.trupanion.com/">https://www.trupanion.com/</a>	Large	Dog and cat owners	Unlimited payouts for life
Healthy Paws	Indirect	Bellevue, WA	Pet insurance & foundation	\$\$\$\$	<a href="http://healthypawspetinsurance.com">healthypawspetinsurance.com</a>	Large	Dog and cat owners	Claims processed within 2 days

An audit of a few competitors' products provided direction on gaps and opportunities with the AcutePlus web app.

	UX (rated needs work, okay, good, or outstanding)			
	First impressions	Interaction		Visual design
	App or mobile website experience	Features	Accessibility	Navigation
Fetch	Good <ul style="list-style-type: none"><li>Fully Responsive</li><li>Busy</li></ul>	Good <ul style="list-style-type: none"><li>Need to enroll to see pricing</li><li>Coverages are really clear</li></ul>	Good <ul style="list-style-type: none"><li>High contrast for screen reader</li><li>Must have email to do anything</li></ul>	Okay <ul style="list-style-type: none"><li>Sticky menu makes it easy to navigate</li><li>Not clear where to go next</li></ul>
Trupanion	Good <ul style="list-style-type: none"><li>Fully Responsive</li><li>Some screen sizes are rough</li></ul>	Need work <ul style="list-style-type: none"><li>Need to enroll to see pricing</li><li>Coverages are hard to find</li></ul>	Okay <ul style="list-style-type: none"><li>High contrast for screen reader</li><li>Must have email to do anything</li><li>Buttons don't always work</li></ul>	Outstanding <ul style="list-style-type: none"><li>Sticky menu makes it easy to navigate</li><li>Great flow</li></ul>
Healthy Paws	Okay <ul style="list-style-type: none"><li>Adaptive</li><li>Not all content is there on small screens</li></ul>	Need work <ul style="list-style-type: none"><li>Need to enroll to see pricing</li><li>Coverages are hard to find</li></ul>	Needs work <ul style="list-style-type: none"><li>Must have email to do anything</li><li>Buttons are rough</li></ul>	Needs work <ul style="list-style-type: none"><li>Overloaded with links</li><li>Some buttons have breaks</li></ul>

# User Research: Pain Points

---

## Time:

Equestrians are too busy to go through confusing information.

## Usability:

Other websites with similar functions don't have a defined user flow.

# Personas

---

## **Miranda** | She/Her - Barn Manager - 52 - Netherlands

Miranda used to be a dressage rider, but now she manages and trains riders to ride competitively. She takes her clients' horses to get routine checkups and vaccines.

## **Abi** | He/Him - Olympic Rider - 47 - Mexico

Abi is an olympic sport jumper, and he owns a barn and his own show. His horses regularly go for routine well-checks. Sometimes he brings his horses, but usually someone else does it for him.

# User Journey Map: Miranda

Mapping Miranda's user journey revealed how helpful it would be for users to keep track of their veterinary care.

**Miranda** Goal: Minimize friction in a stressful daily environment

Action	Practice	Reflect	Assess	Quantify	Improve
Task List	A. Wake up B. Warm up C. Go to barn	A. Check in B. Catch up C. Clean up	A. Review occupancy B. Review health charts	A. Determine which horses need extra care	A. Warm up the horses B. Save checking charts
Feeling Adjective	<ul style="list-style-type: none"><li>Excited</li><li>Determined</li></ul>	<ul style="list-style-type: none"><li>Hopeful</li><li>Optimistic</li></ul>	<ul style="list-style-type: none"><li>Worried</li><li>Hopeful</li></ul>	<ul style="list-style-type: none"><li>Determined</li><li>Relieved</li></ul>	<ul style="list-style-type: none"><li>Excited</li><li>Hopeful</li></ul>
Improvement Opportunities	<ul style="list-style-type: none"><li>Checklist</li><li>Examples</li></ul>	<ul style="list-style-type: none"><li>Checklist</li><li>Examples</li></ul>	<ul style="list-style-type: none"><li>Easy replay</li><li>Predetermined goals</li></ul>	<ul style="list-style-type: none"><li>Planners</li></ul>	<ul style="list-style-type: none"><li>Planners!</li></ul>

# User Journey Map: Abi

Mapping Abi's user journey revealed how helpful it would be for users to have an easy way to learn about the program.

**Abi** Goal: Improve overall competition level

Action	Practice	Reflect	Access	Quantify	Improve
Task List	A. Wake up B. Warm up C. Go to barn	A. Consider faults B. Record mistakes C. Review with team	A. Determine perfection B. Determine ability	A. Decide what would make it perfect	A. Train and train until the routine is right B. Cool down
Feeling Adjective	<ul style="list-style-type: none"><li>Excited</li><li>Determined</li></ul>	<ul style="list-style-type: none"><li>Annoyed</li><li>Hopeful</li></ul>	<ul style="list-style-type: none"><li>Overwhelmed</li><li>Hopeful</li></ul>	<ul style="list-style-type: none"><li>Glad</li><li>Relieved</li></ul>	<ul style="list-style-type: none"><li>Overwhelmed</li><li>Hopeful</li></ul>
Improvement Opportunities	<ul style="list-style-type: none"><li>Checklist</li><li>Examples</li></ul>	<ul style="list-style-type: none"><li>Checklist</li><li>Examples</li></ul>	<ul style="list-style-type: none"><li>Easy replay</li><li>Predetermined goals</li></ul>	<ul style="list-style-type: none"><li>Planners</li></ul>	<ul style="list-style-type: none"><li>Planners</li></ul>

# Starting the Design

- Ideation
- User flow charts
- Wireframes
- Low-fidelity prototype
- Usability studies

# Ideation

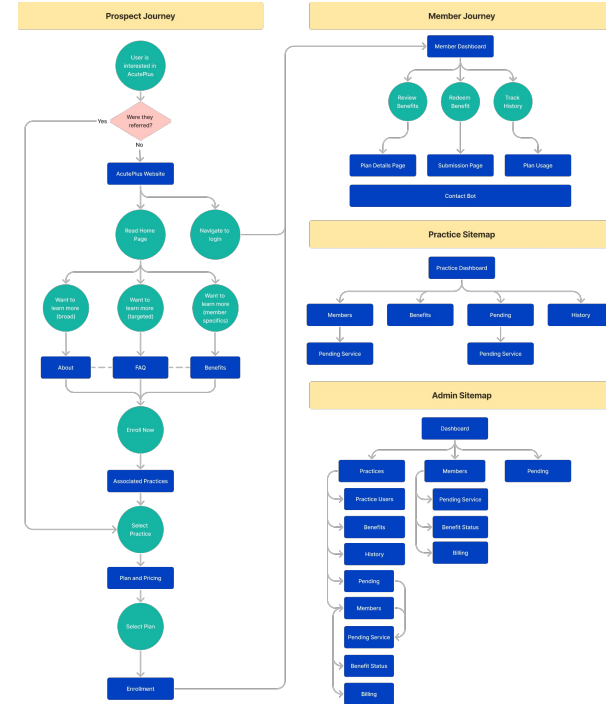

A quick ideation exercise was done to come up with ideas for how to address gaps identified in the competitive audit. Focus was specifically placed on the **funnel from prospect to member**.

# User Flow Charts

With the data and ideas developed from the ideation exercise, user flows were contemplated and recorded. Though four distinct flows have been determined, the main **focus is put on the prospect and the member flows.**

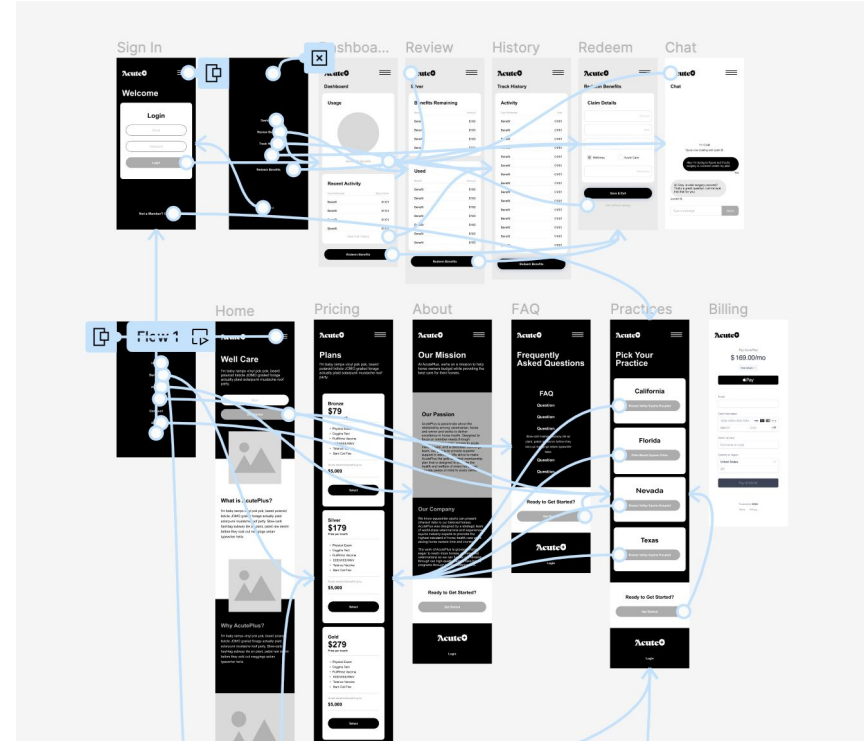

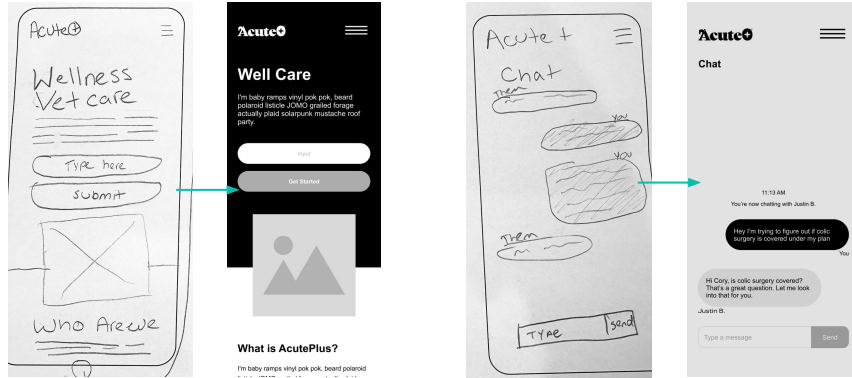

# Paper Wireframes

Taking the time to draft iterations of each screen of the website on paper ensured that the elements that made it to digital wireframes would be well-suited to address user pain points.

# Digital Wireframes

As the initial design phase continued, we made sure to base screen designs on feedback and findings from the user research.

# Low-fidelity Prototype

Using the completed set of digital wireframes, we created a low-fidelity prototype. The main user flow we focused on was the reviewing and enrolling process.

[View Lo-fi Prototype](#)

# Usability Study

---

## Parameters:

- 1) Unmoderated usability study
- 2) 37 participants out of 50
- 3) Wellington, FL / Remote

## Findings:

- 1) Want to understand quickly
- 2) Want streamlined navigation
- 3) Want easier comparisons

# Refine the Design

- Accessibility
- Mockups
- High-fidelity prototype

# Accessibility Considerations

---

**1**

Used larger buttons for effortless clicking for users with limited motor functions.

**2**

Used sticky navigation menu to make navigation simple.

**3**

Enabled horizontal scrolling to make it easier to compare plans.

# Mockups

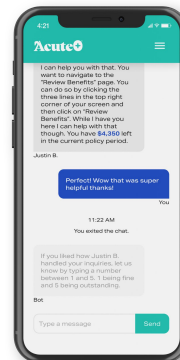

Early designs allowed for some customization, but after the usability studies, we revised the design.

# Key Mockups

## Responsive Website:

- 1) Mobile first
- 2) Interaction design

## Member Portal:

- 1) Web based
- 2) Includes enrollment

# High-fidelity Prototype

The final high-fidelity prototype presented cleaner user flows for learning and enrolling. It also reached users accessibility needs for navigating.

[View Hi-fi Prototype](#)

# Usability Study

---

## Parameters:

- 1) Unmoderated usability study
- 2) 13 participants out of 37
- 3) Remote

## Findings:

- 1) Improved user flow
- 2) Easier navigation

# Going Forward

- Takeaways
- Next steps

# Takeaways

---

## Impact:

The web app allows users to understand the product and enroll in the program.

## Highlights:

**Only used 50% of testing budget.**

**10,000+ users in year one.**

## Next Steps:

Periodically conduct more user research and usability studies to determine any new areas of need.

**Questions?**

# Thanks!
